

Keighley Explorer Belt Expedition

Sponsored Canal Trip

Details of the Canal trip as requested. Each day has the grid reference for the starting point, a midday break point and a finishing point. Good look finding the appropriate OS map but based on the areas I would use: OL21; OL2; 297; 288; 289. Yes I will buy copies of these maps fairly soon but if you want to find it then there you go. Alternatively multimap do have OS maps online so you can try on there.

Hope all this information is useful to you.
